Sandblasting with the latest technology

Our glass doors are refined using the latest sandblasting technology. The automated production ensures a consistently high quality standart.

First, parts of the door that are to remain clear later are covered with a protective film. We cut the templates required for this using a computer.

Then the finest corundum particles are shot onto the glass surface using pressure in the blasting machine. The partial areas that are microscopically roughened by the blasting agent scatter the light evenly and, despite the privacy, offer maximum light transmission, as it is only scattered and not absorbed. The decorations are created by changing from clear to matte surfaces.

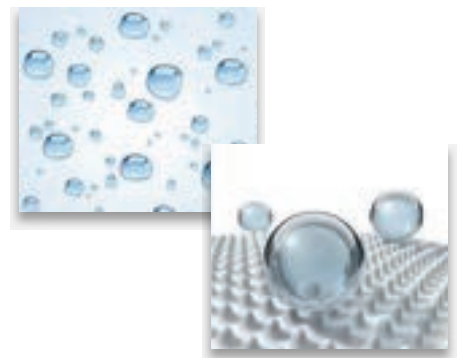

Satin finishing is a mechanical surface treatment that produces a durable and everlasting decoration.

Our nano coating

All sandblasted surfaces are sealed with nanotechnology. The nano liquid is mechanically polished into the surface and creates a hydrophilic film just a few nanometers thick. The result is an invulnerable, chemical-resistant and extremely hard surface. Dirt can hardly stick to the sealed surfaces, making cleaning much easier.

The nano-sealed surfaces also have the so-called lotus effect, meaning they are permanently liquid and dirt-repellent. The perfect surface offers long-term, permanent protection and does not need to be refreshed.

Standart variant:

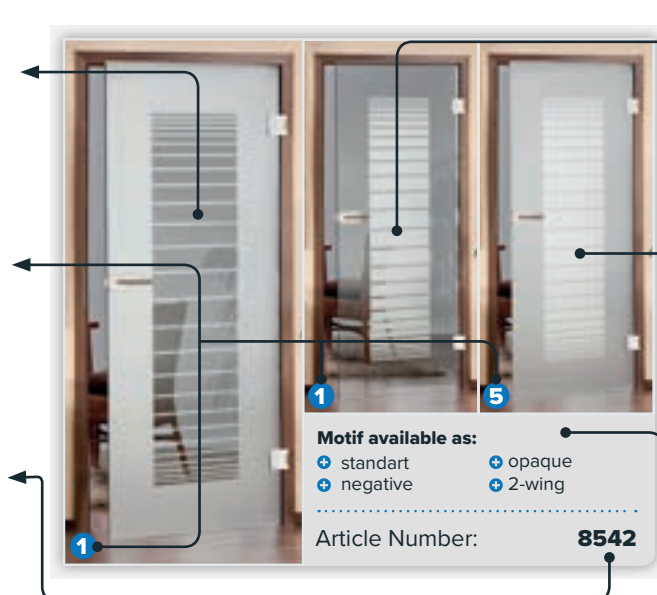

In this variant, the design is printed on the front side.

Price group:

The white number in the orange circle indicates the price group of the motif.

Article Number:

Thanks to the article number, confusion is excluded. Please always specify with every order.

Negative variant:

In this variant, the normal motif is inverted.

Opaque version:

Here, the entire back is sandblasted and the motif on the front is finished with white nano-sealing.

Availability:

In this section you can see in which variations the motif is available.

„Line Motifs“

Your favorite motifs are already waiting for you - from subtle to crazy - for every taste and for every room. If you still don't get your money's worth, there is the option of your own individual desired motif.

Clear lines - subtle in appearance

This motif is one of our "best sellers". No wonder, it fits into any room situation and is ideal for glass door beginners. The motif is perfect for the home as well as for a more elegant look in the business sector. Of course, this glass is "Made in Germany" and offers enormous security.

The motif is available - as with all other motifs - as an opaque, double-winged or negative variant.

The large selection of sandblasted motifs means that the level of opacity can be freely determined. The combination of sandblasted and clear glass surfaces means that the patterns on these motifs are particularly effective and ensure a very exclusive incidence of light.

„Modern Motifs“

Your favorite motifs are already waiting for you - from subtle to crazy - for every taste and for every room. If you still don't get your money's worth, there is the option of your own individual desired motif.

Fresh design - for all rooms

One of the funky motifs in our range. It is an eye-catcher and allows enough light to flow into the room. It adorns several arches that symbolize movement.

The motif is available - as with all other motifs - as an opaque, double-winged or negative variant.

The large selection of sandblasted motifs means that the level of opacity can be freely determined. The combination of sandblasted and smooth glass surfaces means that the patterns on these motifs are particularly effective and ensure a very exclusive incidence of light.

Your favorite motifs are already waiting for you - from subtle to crazy - for every taste and for every room. If you still don't get your money's worth, there is the option of your own individual desired motif.

Flora - Natural Motifs

You will find nature on this door in its stylistically reworked beauty. The motif depicts leaves on tendrils that swing through this motif.

The motif is available - as with all other motifs - as an opaque, double-winged or negative variant.

The large selection of sandblasted motifs means that the level of opacity can be freely determined. The combination of sandblasted and smooth glass surfaces means that the patterns on these motifs are particularly effective and ensure a very exclusive incidence of light.

„Geometric Motifs“

Your favorite motifs are already waiting for you - from subtle to crazy - for every taste and for every room. If you still don't get your money's worth, there is the option of your own individual desired motif.

Geometric shapes - refreshingly different.

Geometry can be very interesting if you interpret it correctly. In this motif we combine modernity with geometric shapes.

The motif is available - as with all other motifs - as an opaque, double-winged or negative variant.

The large selection of sandblasted motifs means that the level of opacity can be freely determined. The combination of sandblasted and smooth glass surfaces means that the patterns on these motifs are particularly effective and ensure a very exclusive incidence of light.

„Retro Motifs“

Your favorite motifs are already waiting for you - from subtle to crazy - for every taste and for every room. If you still don't get your money's worth, there is the option of your own individual desired motif.

From old to new?

We don't make it that easy for ourselves. This motif combines the style of the past with a pinch of modern art - the result is something completely new and creative.

The motif is available - as with all other motifs - as an opaque, double-winged or negative variant.

The large selection of sandblasted motifs means that the level of opacity can be freely determined. The combination of sandblasted and smooth glass surfaces means that the patterns on these motifs are particularly effective and ensure a very exclusive incidence of light.
